Notes

Labour

The final invoice will be calculated according to actual equipment used and technician time incurred, charged at the rates prevailing at the time.

Lighting – Gobos

There may be colour matching discrepancies when ordering custom colour glass gobos and you should consult your audio-visual project manager when considering this option.

Radio microphones

The Queen Elizabeth II Centre (QEII Centre) has dedicated private frequencies.

Radio microphones may cause breaches in security and organisers should be aware of this. QEII Live must be notified of any radio microphone frequencies that are externally supplied, prior to the event. We do not recommend the use of Channel 38 in the QEII Centre

Rates

All prices are exclusive of VAT.

Rates are per day unless otherwise stated. For events over three days a special rate may be negotiated at the discretion of the QEII Live Project Manager. Rigging charges are additional.

A 7% project management fee will be added for project management services outside of the AV package costs.

The Centre reserves the right to surcharge for amendments to requirements made within 5 working days of the commencement of the hire period.

QEII Live, the Audio-Visual Department of the Queen Elizabeth II Centre, adheres to the Government's guidelines on Sustainability, all in-house stage sets, and radio microphone batteries are recyclable.

Please read our Terms and Conditions.
